

November 11, 2025

Dear Dom Einhorn,

*Please note that all information contained in this letter is confidential and should not be released to the public until November 11, 2025.*

On behalf of HundrED, I am delighted to inform you about the selection of Intelligent Games LLC's "Masters of Trivia" to the HundrED Global Collection 2026. This honour is a notable achievement and we invite you to celebrate their accomplishment of representing education innovations from United States on a global scale.

HundrED is a mission-driven organisation dedicated to ensuring that all children flourish through equitable access to quality education. Each year, HundrED seeks out, validates, and curates the 100 most innovative, impactful, and scalable educational solutions in its annual Global Collection. The selection process is highly competitive and involves multiple rounds of rigorous evaluations, including review by HundrED's Academy of worldwide education experts.

"Masters of Trivia" was first shortlisted by HundrED's Research Team from a pool of almost 800 submissions. It was then evaluated for impact and scalability by the 242 members of the HundrED Academy. HundrED's Research Team carefully considered the Academy evaluations to make a final selection. After this third round of reviews, "Masters of Trivia" was awarded a place in the Global Collection 2026. This recognition cements Masters of Trivia's dedication to our collective mission of "Every Child to Flourish," and celebrates its contribution to making a tangible difference in promoting education equity, accessibility, and quality.

The Global Collection 2026 will be released through an online celebration on November 11, 2025. We hope that you will celebrate this great achievement along with the HundrED Community and share this news locally and with your broader networks.

Best Regards,

**Lasse Leponiemi,**

Co-Founder & Executive Director, HundrED.org

Chair, HundrED Foundation
